

HMD Connect Pro. Connectivity for IoT devices around the world.

HMD Connect Pro is a global solution that gives you the ability to oversee all SIM cards in your fleet with a simple management console. With it, you can view and manage IoT devices all around the world, including devices used by your employees in their day-to-day work.

Worldwide connectivity

Simply load one of our data-only SIM cards into your IoT device and it'll be connected in over 180 countries. With over 600 networks worldwide you'll get great coverage too. You're in full control with our

simple management console; group SIMs, view session data and review data usage in near real-time and stay on top of costs worldwide.

Controlled security

Activate and deactivate SIM cards from the management console at any given time. You'll also be able to see when a SIM has been moved from one device to another, giving you the ability to stay on top of security in a controlled way. And the data itself? It's routed securely, no matter where in the world your IoT devices are.

The benefits

- ✓ Connect IoT devices worldwide
- ✓ Manage all SIMs remotely
- ✓ Control every SIM in your fleet
- ✓ Reduce permanent roaming issues
- ✓ Enjoy transparent pricing
- ✓ Manage billing and costs easily
- ✓ Use it with any device brand
- ✓ Securely use and manage your data
